

YOUR ORGANIC CONTENT, EXPLAINED

Organic is the content you post on **your own socials**. It works differently from your paid ads - here is the difference, start to finish.

Your walkthrough video is on the way. Until it lands, this one-pager covers exactly the same thing - read it once and you are set.

1

ADS VS ORGANIC

THE BIG DIFFERENCE

With ads, we build it and **we** launch it. With organic, we build it and hand it back to **you** to post. We are your content team - you own what goes out.

2

CREDIT METER

YOUR MONTHLY CREDITS

Up top you will see your creatives for the month - say **4 of 12**. Split them between video and graphics however you want. The count resets on the 1st, with no rollover, so use them.

3

REQUEST A NEW CREATIVE

REQUEST A CREATIVE

Hit **Request a new creative**. Drop in your footage or photos, tell us the vibe and any copy, and pick the **format** and **captions**. Submit - that is one creative off your monthly total.

4

STATUS: REVIEW

REVIEW AND APPROVE

When it is done it comes back to **you**, marked **Review**. Love it? **Approve**. Want a tweak? **Request changes** - that does not cost another credit, it is the same creative.

5

CREATIVE BANK

YOUR CREATIVE BANK

Approve it and it drops into your **Creative Bank** - your library of finished, ready-to-post content. Download anytime and post straight to your socials.

Request it, we make it, **you review and approve**, it lands in your bank, you post. Questions? Message the team right in the portal.
